Software Engineer Intern (Mobile)

CoinGecko Malaysia Remote RM 1,500 a month

Apply now

Pay RM 1,500 a month

Job type Internship

Full job description

CoinGecko is a global leader in tracking cryptocurrency data. Operating since 2014, CoinGecko has built the world's largest cryptocurrency data platform, tracking over 10,000 tokens across more than 400 exchanges, serving over 300 million page views in more than 100 countries. We are proud to have played a major part in mainstream awareness, adoption, and education of cryptocurrency globally.

We at CoinGecko believe that cryptocurrency and blockchain will define the future of finance, bringing greater financial and economic freedom around the world. In anticipation of that future, CoinGecko is building the foundation to scale cryptocurrency market data to serve billions.

Please note that we will only be considering students pursuing their Bachelor's degree, or fresh graduates within a year of their graduation date for all internship openings.

What you'll be doing:

- Mobile design & development:** Assist to design and develop mobile applications that meet the business' needs and requirements. Support execution of full software development lifecycles based on the department's strategy.
- Software development:** Write clean, reusable and maintainable code and libraries. Contribute in releasing mobile applications to different app stores.
